To our Valued Customer:

In recognition of the desire to eliminate materials that contain natural rubber latex in Medical Devices, CooperSurgical has taken every possible measure to remove latex from our product offering.

Unfortunately, and due to the necessity of certain performance characteristics in a limited few circumstances, we are unable to substitute alternative materials in the following devices:

<u>Product Description</u>	<u>REF #</u>	<u>Latex Component</u>
Inflatoball Pessary 2.0 ZUI Uterine Injector	MXKPINF ZSI1153	Inflatable Pessary Distal Balloon

It is our mission to furnish clinically beneficial products that enable physicians to provide increasingly more efficient and effective health care to women. Please know that we appreciate the opportunity to serve your needs.

James E. Keller
