

Plume-Away® now from CooperSurgical

The highly-effective laparoscopic smoke evacuation system is now available directly from CooperSurgical, Inc.

Trumbull, Conn., November 3, 2014 – CooperSurgical, the sole manufacturer of Plume-Away® Smoke Evacuation system announced that as of November 1, 2014, it will begin directly selling this very effective system to clinical users.

CooperSurgical’s highly trained clinical sales specialists are now offering both Plume-Away 4.0 and Ultra Plume-Away 6.0 as part of their comprehensive surgical device portfolio.

“Being the manufacturer of Plume-Away and having a sales organization that is accustomed to the surgical environment, it was natural for us to start selling Plume-Away along with our other industry leading surgical products,” said Dr. Robert Auerbach, Executive Vice President & Chief Medical Officer.

The passive, disposable, multi-stage Plume-Away system traps smoke, particulates and aerosolized pathogens while an activated charcoal membrane absorbs odors and chemical toxins. This system removes 99.999% of .01 micron particles from surgical procedure sites. The optimized air flow rate remains steady, maintaining pneumoperitoneum and providing an unobstructed view of the surgical site. Plume-Away is easy to use requiring no attachment to wall suction.

About CooperSurgical

Since its founding in 1990, CooperSurgical has researched, developed, and manufactured a wide range of trusted medical devices that have advanced the standard of women’s health care. Our products are used by physicians and health care professionals in hospitals and their practices for a wide variety of procedures, from basic annual gynecological exams to complex surgeries.

CooperSurgical, Inc., is a wholly owned subsidiary of The Cooper Companies (NYSE:COO). The company, headquartered in Trumbull, CT, produces and markets a wide array of products for use by women’s health care clinicians. More information can be found at www.CooperSurgical.com.
