

*Hunt Organizer keeps instruments within easy reach during operative laparoscopy procedures.*

*The new Hunt Organizer now makes it easier than ever for surgeons and scrub nurses to access instruments during operative laparoscopy. The Organizer has individual compartments to hold up to 8 instruments. The saddlebag design enables the Organizer to be draped across the patient's leg, within easy reach. Each compartment has a wide opening, making removal and insertion of instruments effortless. Watertight compartments can be used for holding, bathing, rinsing, and cooling instruments needed during surgery. The Hunt Organizer...another practical innovation for operative laparoscopy procedures, available now from Apple Medical.*
