

ICD-10-CM Diagnosis Code Examples Supporting Medical Necessity of Noninvasive Vascular Testing

The code set used to report diagnoses will transition from ICD-9-CM to ICD-10-CM effective October 1, 2015. ICD-10 will offer a greater degree of specific information in areas such as initial or subsequent encounter and other relevant clinical information. This guide provides the first three alphanumeric digits of the relevant ICD-10-CM code only when multiple codes are available—an “X” denotes that further digits are required. The provider should refer to the ICD-10-CM manual for specific codes that support medical necessity of noninvasive vascular testing, since they are too numerous to list in this guide.
