

Hoyte Sacro Tips for Vaginal Prolapse Repair

Sacrocolpopexy Tip

Sacrocerivopexy Tip

Designed to Facilitate Suturing

Mesh placement during sacrocolpopexy or sacrocerivopexy can be cumbersome and time-consuming. The Hoyte Sacro Tips, used in conjunction with the Advincula Arch handle, are an ideal solution. Supplying constant tension, tissue migration is minimized during mesh attachment. Hoyte Sacro Tips offer a number of unique benefits:

- Contoured to fit securely and comfortably in the vagina, these tapered devices provide both a leading edge for bladder separation and a flat surface area for streamlined suturing.
- The Hoyte Sacro Tips connect to the Advincula Arch™ Handle, providing a 1-for-1 tactile tissue feel.
- The Sacrocerivopexy tips provide a landing area for the cervix, allowing easier placement and suturing.
- Ideally suited to work with the ALLY Uterine Positioning System®, the Hoyte Sacro Tips provide static control and optimal exposure while suturing.

Product Description

The **Hoyte Sacrocolpopexy Tips** (Hoyte Sacro Tips) are used for laparoscopic vaginal prolapse repair procedures when the cervix is removed. The Hoyte Sacro Tip is made out of a hard polycarbonate plastic and is offered in small and large tip sizes.

The **Hoyte Sacrocervicopexy Tips** are used for laparoscopic vaginal prolapse repair procedures where the cervix remains. The Hoyte Sacro Tip is made out of a hard polycarbonate plastic offered in a small and large tip size.

Indications for Use

The Hoyte Sacro Tips are intended to be connected to the Advincula Arch Handle (UMH750) and may be utilized for any laparoscopic or open procedure in which elevating the vaginal tissue into the operative field would be beneficial. The single-use Hoyte Sacro Tips are intended to provide a solid base or “thimble-like” surface for placing sutures.

Ordering Information

Product Code	Description

LH-SCERV-SML	Sacrocervicopexy Tip - Small, Single-use (3 per Box)
UMH-750	Advincula Arch Handle (1 each)

**Lennox Hoyte
MD, MSECS**

I designed the sacro tip to match the natural shape of the vagina, in order to make it easy to dissect the tissues, place and suture the sacrocolpopexy mesh to the vagina. The design is based on my knowledge learned from many years of pelvic MRI research, personal detailed review and 3D reconstruction of thousands of female pelvic MRI datasets.

CooperSurgical

CooperSurgical is the leading manufacturer of innovative medical devices and procedure oriented solutions that advance the standard of care. Our highly reliable and clinically relevant products, as well as nearly 150 clinically trained utilization sales specialist facilitate the delivery of enhanced outcomes for your patients, regardless of the clinical setting.
