### IMPORTANT SAFETY INFORMATION

Endosee Advance Direct Visualization System is indicated for viewing the cervical canal, uterine cavity, or female urinary tract, for the purpose of performing diagnostic and therapeutic procedures. Hysteroscopy is contraindicated in patients with known or suspected pelvic inflammatory disease. Hysteroscopy may be contraindicated in patients with inability to distend the uterus, cervical stenosis, cervical/vaginal infection, uterine bleeding or menses, known pregnancy, invasive carcinoma of the cervix, recent uterine perforation, or intolerance to anesthesia. Cystoscopy is contraindicated in patients with severe coagulopathy or febrile patients with urinary tract infection. Please refer to Instructions for Use for more information.
