

ALLY II Uterine
Positioning System™

The ALLY II UPS™ takes your procedures to the next level

Newly redesigned Uterine Positioning System (UPS)

- Dynamic range of motion and reach and elimination of dead spaces
- Improved flexibility in bed rail positioning
- Rotates out of the way to provide easy access between the patient's legs
- Ergonomic handle design for easy mounting and dismounting on bed rail
- Cleaned with isopropyl alcohol or CaviWipes™

ALLY II Uterine Positioning System™

Unmatched consistency for optimal patient outcomes in minimally invasive gynecologic procedures

Securely holds uterine manipulator in position for optimal visualization, access, and patient safety

Ensures hands-free static pressure on tissue during procedure

Provides enduring control of key anatomical structures during all laparoscopic GYN procedures

Important Safety Information: The ALLY II UPS™ and the sterile, **Single-Use** Adapter Drape for the ALLY II UPS™ are intended to secure uterine manipulator devices for uterine positioning and to assist the surgical staff in mounting, positioning, and holding uterine manipulators during gynecological laparoscopic surgical procedures. **CONTRAINDICATIONS:** CooperSurgical manipulator handles should not be used when an IUD is in place, when the patient is pregnant, planned gamete intrafallopian transfer procedures, in patients with suspected pelvic infections or where it is difficult to insert the silicone tip into the cervix or uterus. **WARNINGS:** ALLY II UPS is only intended for use with CooperSurgical's family of uterine manipulators. Read Instructions for Use carefully, as failure to properly follow the instructions could lead to **injury and improper functioning of the device.** <https://www.coopersurgical.com/ally-ii-ifu>
