Applicable FARS/DFARS Restrictions Apply to Government Use. Fee schedules, relative value units, conversion factors and/or related components are not assigned by the AMA, are not part of CPT and the AMA is not recommending their use. The AMA does not directly or indirectly practice medicine or dispense medical services. The AMA assumes no liability for data contained or not contained herein.

Reimbursement and coding information provided herein is gathered from third-party sources and is subject to change. This information is presented for illustrative purposes only. This information does not constitute reimbursement or legal advice, and is not intended as a guarantee of coverage or payment at any particular payment rate. CooperSurgical makes no representation or warranty regarding this information or its completeness, accuracy or timeliness. Laws, regulations and payer policies concerning reimbursement are complex and change frequently. The decision about which code(s) to report must be made by the billing provider/physician considering the clinical facts, circumstances, and applicable coding rules. The code(s) selected should be supported by the contents of any clinical notes and/or chart documentation. Please contact your third-party payer for more specific guidance.

PROM Assessment by evaluation of cervicovaginal fluid for specific amniotic fluid protein(s)

Payments for physician services are established by CPT codes according to a fee schedule. Under the Medicare Physician Fee Schedule, CPT codes are assigned Relative Value Units (RVUs) which represent the relative amount of physician work, resources and expertise needed to provide services to patients. Payments differ depending upon where the service is provided (facility or non-facility) to accommodate the expenses associated with procedural equipment, personnel, supplies, etc.

Applicable CPT Code to report testing with Actim PROM	
84112	Evaluation of cervicovaginal fluid for specific amniotic fluid protein(s) (eg, placental alpha microglobulin-1 [pamg-1], placental protein 12 [pp12], alpha-fetoprotein), qualitative, each specimen)

Applicable ICD-10-CM Code to report testing with Actim PROM *	
O42.X++	Premature rupture of membranes

**For a complete list of ICD-10-CM diagnosis codes, please consult the 2023 ICD-10-CM codebook. CooperSurgical is not suggesting that the above CPT codes will be covered if you use these ICD codes.*
