

# Hoyte Sacro Tips for Vaginal Prolapse Repair

**Now With a  
Deeper Scallop  
Designed for  
Anatomical Fit**

## Designed to Facilitate Suturing

Mesh placement during sacrocolpopexy or sacrocervicopexy can be cumbersome and time-consuming. The Hoyte Sacro Tips, used in conjunction with the Advincula Arch® Handle, supply constant tension that facilitates minimized tissue migration during mesh attachment. Hoyte Sacro Tips offer a number of unique benefits:

- Contoured tips designed to fit securely and comfortably in the vagina, facilitate separation from the bladder and rectum, and create a surface for streamlined suturing.
- Hoyte Sacro Tips connect to the Advincula Arch Handle and are designed to provide tactile feedback as cephalad pressure is exerted.
- The Sacrocervicopexy tips provide a solid base area for the cervix, facilitating easier placement and suturing of the mesh.
- Ideally suited to work with the ALLY Uterine Positioning System®, the Hoyte Sacro Tips provide static control and optimal exposure while suturing.

## Product Description

The **Hoyte Sacrocolpopexy Tips** (Hoyte Sacro Tips) are used for laparoscopic vaginal prolapse repair procedures when the cervix is removed. The Hoyte Sacro Tip is made out of a hard polycarbonate plastic and is offered in a small and large tip size.

The **Hoyte Sacrocervicopexy Tips** are used for laparoscopic vaginal prolapse repair procedures where the cervix remains. The Hoyte Sacro Tip is made out of a hard polycarbonate plastic offered in a small and large tip size.

## Indications for Use

The Hoyte Sacro Tips are intended to be connected to the Advincula Arch Handle (UMH750) and may be utilized for any laparoscopic or open procedure in which elevating the vaginal tissue into the operative field would be beneficial. The single-use Hoyte Sacro Tips are intended to provide a solid base or “thimble-like” surface for placing sutures.

## Ordering Information

Product Code	Description
LH-SCOLPO-LRG	Sacrocolpopexy Tip - Large, Single-use (3 per Box)
LH-SCOLPO-SML	Sacrocolpopexy Tip - Small, Single-use (3 per Box)
LH-SCERV-LRG	Sacro cervicopexy Tip - Large, Single-use (3 per Box)
LH-SCERV-SML	Sacro cervicopexy Tip - Small, Single-use (3 per Box)
UMH750	Advincula Arch Handle (1 each)

**Lennox Hoyte**  
MD, MSECS

I designed the sacro tip to match the natural shape of the vagina; in order to make it easy to dissect the tissues, place and suture the sacrocolpopexy mesh to the vagina. The design is based on my knowledge learned from many years of pelvic MRI research, personal detailed review and 3D reconstruction of thousands of female pelvic MRI datasets.
